<b>Description</b>	An externally threaded fastener with an oversized countersunk head, crossed recess, a single lead thread and a shank with a reduced diameter.
<b>Applications / Advantages</b>	The larger head size is ideal for fitting drawer slides and hinge plates in how they compensate for pre-drilled holes that run large. The deeper thread design offers greater resistance to pull-out forces. The type-17 chip cavity reduces the chances of splitting the wood.
<b>Material</b>	C1022 case-hardened steel
<b>Surface Hardness</b>	Rockwell C 45 minimim
<b>Case Depth</b>	0.004" - 0.009"
<b>Torque</b>	#6: 22 kg/cm minimum
<b>Plating</b>	See Appendix-A for plating information
