	Over 5/8 to 1.5"						+0 / -0.05					
	Over 1.5 to 2.75"						+0 / -0.06					
	Over 2.75 to 5"						+0 / -0.09					

<b>Description</b>	An externally threaded fastener with a dome-shaped head and an integrally formed washer; a recess that can accommodate a Phillips screwdriver; and a single lead thread. The head is approximately 33% larger than that of a typical round washer screw of the same nominal diameter. The shank has a reduced diameter and a chip cavity cut out where the final several threads, ending at the tip.
<b>Applications / Advantages</b>	The deeper thread design offers greater resistance to pull-out forces. The chip cavity (or auger point) enables the fastener to drive—especially in denser woods—without pre-drilling a pilot hole. The extra large head (a) allows for precise adjustment when aligning multiple drawer fronts to one another, and (b) offers a greater bearing surface than a countersunk design.
<b>Material</b>	C1022 case-hardened steel
<b>Surface Hardness</b>	Rockwell C 45 minimum
<b>Case Depth</b>	0.004" - 0.009"
<b>Torque</b>	35 kg/cm minimum
<b>Plating</b>	See Appendix-A for plating information
