	Over 2.75 to 5"						+0 / -0.09					

<b>Description</b>	An externally threaded fastener with a countersunk head, crossed recess that will also accept a square driver bit, a single lead thread and a shank with a reduced diameter. The nibs on the underside of the head aid in the countersinking process by removing additional material. The shank has a reduced diameter and a chip cavity cut out where the final several threads end at the tip.
<b>Applications / Advantages</b>	The deeper thread design offers greater resistance to pull-out forces. The nibs on the bearing surface of the head helps the screw seat flush. The type-17 point enables faster starting. The recess design allows for multiple drive tools. Popular use is in cabinet assembly.
<b>Material</b>	C1022 case-hardened steel
<b>Surface Hardness</b>	Rockwell C 45 minimim
<b>Case Depth</b>	0.004" - 0.009"
<b>Torque (Minimum)</b>	#6: 21 kg/cm #8: 37 kg/cm #9: 45 kg/cm #10: 55 kg/cm
<b>Plating</b>	See Appendix-A for plating information
