	Over 2.75 to 5"						± 0.09					

Description	An externally threaded fastener with a dome-shaped head, square recess and a single lead thread. The shank has a reduced diameter and a chip cavity cut out where the final several threads, ending at the tip. Square recess is preferred in many overhead installations.	
Applications / Advantages	The deeper thread design offers greater resistance to pull-out forces as compared to standard wood screws. Popular in fastening cabinet hardware.	Used in environments where corrosion resistance is necessary. The type-17 point enables the screw to more easily penetrate the material into which it's fastened. Can be used in particle board, wood and some plastics.
Material	C1018 - 1022 case-hardened steel	18-8 Stainless Steel
Surface Hardness	Vickers 450 HV minimum	
Case Depth	0.004" - 0.009"	
Plating	See Appendix-A for plating information	Stainless deep thread screws are usually supplied without additional finish.
